LinkedIn: Guillermo Benito-Calviño
Residence: Lyon, France

About me

PhD candidate in Computer Science with a background in Physics. My research focuses on active gas source localization using multi-agent sensing systems, combining modeling of gas dispersion, probabilistic inference, and information theory. My broader interests lie in statistical physics, stochastic processes, and the mathematical modeling of natural phenomena and complex systems.

Education

PhD in Computer Science — Lyon, France
INRIA & INSA Lyon — 2024 – present

Thesis: Victim localization in search and rescue missions using UAV networks
Supervisors: Ahmed Boubrima and Hervé Rivano

Master Degree in Physics of Data — Padova, Italy
University of Padova — 2022 – 2024

Main topics: Statistical physics, Stochastic modelling, Machine learning (deep learning), Bayesian Inference.
Final grade: *110/110*
Thesis: *Building a formal model about the efficacy of centralizing knowledge*

Degree in Physics — Madrid, Spain
Universidad Complutense de Madrid — 2018 – 2022

Average : *7.99/10*
Thesis: *Information and entropy in hadron jets*

Science modality High school — Tarragona, Spain
Teaching center Lestonnac-l'Ensenyança — 2016 – 2018

University admission grade: *12.55/14*

Work Experience

Research Intern Lyon, France
ENS Lyon (Pablo Jensen) & Inria (Eric Tannier) March 2024 – August 2024
Building a formal model about the efficacy of centralizing knowledge

Publications

Guillermo Benito-Calviño, Pablo Jensen, ORION: Olfactory and RF Multimodal Sensing for UAV-Based Localization of Disaster Victims, DCOSS-IoT, Reykjavik, Iceland, 2026

Guillermo Benito-Calviño, Pablo Jensen, Simple model for the transition from local to centralized production, Physical Review E, Volume 111, March 2025.

Guillermo Benito-Calviño, Javier García-Olivares, Felipe J. Llanes-Estrada, Information entropy and fragmentation functions, Nuclear Physics A, Volume 1036, August 2023.

Skills

Programming
Expert in: Python, R.
Comfortable with: PyTorch, SQL, Dask, Bash, Julia.

Languages
Spanish: Native
Catalan: Native
English: C1 (Certificate in ESOL)
Italian: B2
French: B1

Honors & Awards

PhD Scholarship INRIA BMI (by INRIA Lyon) 2022
Departmental Scholarship from the Department of Physics and Astronomy (by University of Padova) 2022
Hackaton on AI (by Deep Code La Caixa) 2021
Honorary award
